
CPU time per point relative to LEGENDRE_a (median over the three point sets; below 1 = faster)
(a) Acceleration
(b) Acceleration + gravity gradient
CPU time / CPU time of LEGENDRE_a
Maximum degree N
Maximum degree N
CLENSHAW
METRIS
PINES
LEGENDRE_b
GOTTLIEB
LEGENDRE_a
LEAR
Within 5% of LEGENDRE_a (timing noise)
Vertical bars: range over the three point sets
Curves stop where a method overflows: PINES and GOTTLIEB from N = 1500, CLENSHAW from N = 2000
